We had an active but lower market on 122 head. What we gained last week, we gave it back this week. I get asked every week what calves are worth and I can't tell them because the market moves \$5-\$10 up and down each week and sometimes each day! The people I talk with all agree that they don't know where we going and they are the poeple buying the cattle. Most say they watch the market each day and adjust their bids accordingly. They also agree that you can't out guess the market. If you have cattle to sell, give us a call!
